{ IS300™ - Intrinsically Safe Light }

Going into a hazardous location? Don't come to the end of your rope! The intrinsically safe, cordless IS300 can go where your work takes you! Whether in beam mode for use as an inspection light or flood mode for an area task light, the IS300 is versatile enough to meet your needs. The IS300 is perfect for:

- Petro/chemical Industries • Natural Gas Industry • Aircraft Maintenance/Manufacture • Water Treatment Facilities
- Electric/Power Generation Plants • Paint Operations • Truck/Bus Shops • Lubrication Pits and more!

{ features }

- Rated for use in Class One, Division One, Groups C & D locations, temperature code T3
- Three 3-watt lensed LEDs provide bright light in hazardous locations
- Sliding lense assembly provides a beam or floodlight
- Rotating hanging hook stores out of the way
- Patented battery technology allows user to change the battery pack inside the hazardous areas
- Covered on-off switch in handle
- Optional lense cap protects the sliding LED lense from debris and overspray
- Optional lanyard on handle helps prevent accidental drops
- ETL listed for use in USA and Canada

Sliding lense assembly provides a beam or floodlight

- Pivoting light fixture allows user to shine the light where it is needed. Simply loosen knob at neck of light to adjust and tighten the knob to firmly fix the light direction in place.

- 4.8 volt NiMH battery pack will operate the light for up to seven hours and has a battery indicator light that warns the user of low battery charge.
- 120V charger(5000-1345) comes with trickle charge feature to prevent battery from being overcharged.

| model # | description | case qty. | case wt. |
|-----------|--|-----------|----------|
| 2301-0000 | IS300 with two battery packs, with charger, with wrist strap, with lense cover | 1 | 9 lbs. |
